THE COLLECTION

The W.J. Noble Numismatic Library comprises an extensive collection of reference books, journals and catalogues covering ancient Greek, Roman, Byzantine, Celtic, medieval and Islamic coinage, together with British, European, Latin American, North American, Southeast Asian, Chinese, Japanese, Indian and Australasian coins, medals and tokens.

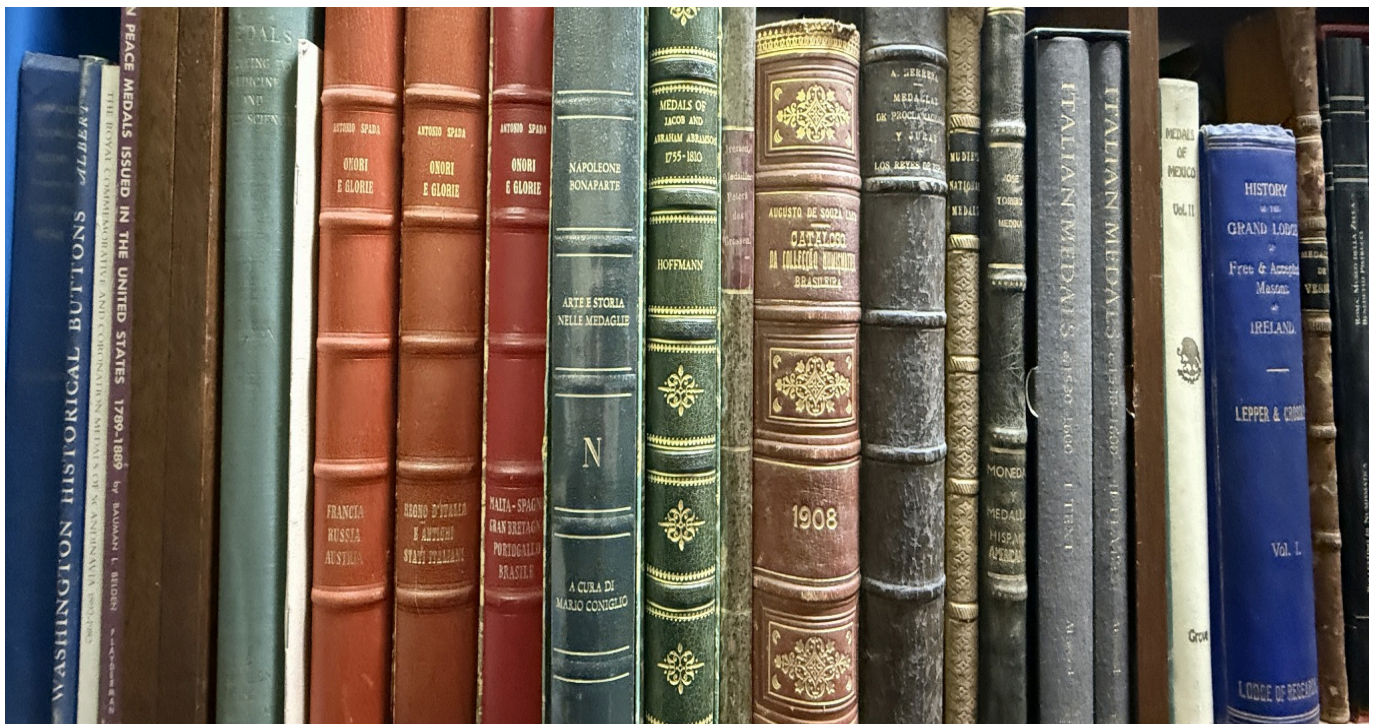

The British token references and catalogues, particularly those relating to the Conder series, are considered among the most comprehensive encountered, as are the references relating to Presbyterian Communion Tokens.

The library includes multiple copies of certain books and catalogues, together with duplicate stock. These holdings provide an opportunity for the purchaser to progressively resell individual publications over an extended period.
